Preparative Layer Chromatography explains how this method is used for separating large quantities of mixtures containing a wide variety of important compounds. It offers a broad review of preparative layer chromatography (PLC) applications and adaptable working procedures for microseparations involving organic, inorganic, and organometallic compounds.

The book contains theoretical background, chemical principles, and relevance of preparative layer chromatography (PLC) to a wide range of applications, particularly in the study of pharmaceuticals and biochemistry. Written by many of the best known and most knowledgeable specialists in the field, the authors describe all the necessary techniques, current procedures, and superior strategies for selecting the most suitable eluents and designing application-specific PLC systems based on the data being sought. They provide comprehensive instructions, surrounding issues, and suggestions for optimizing optional working techniques within the framework of PLC. The book also provides a complete coverage of bulk sorbents and precoated chromatographic plates available on the international market.

A comprehensive, yet accessible source of information, Preparative Layer Chromatography is a relevant and practical text for experienced as well as novice researchers and practitioners involved in analytical, environmental, geochemical, biological, medicinal, and pharmaceutical analysis.
Application of Preparative Layer Chromatography to Lipids; Weerasinghe M. Indrasena
The Use of PLC for Separation of Natural Pigments; George W. Francis
Application of PLC to Inorganics and Organometallics; Ali Mohammad
PLC in a Cleanup and Group Fractionation of Geochemical Samples: A Review of Commonly Applied Techniques; Monika J. Fabiańska

The Use of PLC for Isolation and Identification of Unknown Compounds from the Frankincense Resin (Olibanum): Strategies for Finding Marker Substances; Angelika Koch, Rita Richter, and Sima Basar

Index

Handbook of Affinity Chromatography, 2nd Edition
David S. Hage
University of Nebraska, Lincoln, USA
Chromatographic Science, Volume 92
This essential handbook guides researchers in the theory, applications, and practical use of affinity chromatography. New topics include new ligands, recently developed applications—ranging from clinical and pharmaceutical analysis to biotechnology and environmental testing—and affinity-based immunoassays.
Catalog no. DK1199, 2005, 872 pp.
ISBN: 0-8493-4039-X / $169.95 / £97.00

Microfluidic Lab-on-a-Chip for Chemical and Biological Analysis and Discovery
Paul C.H. Li
Simon Fraser University, British Columbia, Canada
A volume in the Chromatographic Science series
This book offers an overview of the available technology, its limitations, and its breakthroughs over the years. It emphasizes analytical applications of microfluidic technology and offers in-depth coverage of micromachining methods, microfluidic operations, chemical separations, sample preparation and injection methods, detection technology, and various chemical and biological analyses.
Catalog no. DK3682, January 2006, 528 pp.
ISBN: 1-57444572-3 / £169.95 / £97.00

Separation Methods in Proteomics
Edited by Gary B. Smejkal
Pressure Biosciences, Inc., West Bridgewater, Massachusetts, USA
Alexander Lazarev
Proteome Systems Inc., Woburn, Massachusetts, USA
Separation Methods in Proteomics provides a comprehensive examination of all major separation techniques for proteomics research. Coverage extends across the entire process, from sample preparation to clinical and research applications such as drug and biomarker discovery. The text is ideal for scientists in proteomics, genomics, transcriptomics, biomarker discovery, and drug discovery.
Catalog no. DK3068, January 2006, 536 pp.
ISBN: 0-8493-2699-5 / £159.95 / £92.00

Please use this ORDER FORM, CALL or ORDER ONLINE at WWW.CRCPRESS.COM

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. If purchasing by credit card please be sure to include the 3 digit security code that appears on the back of your card in the "sec code" field provided below. U.S./Canada: All orders must be paid in U.S. dollars. Tax. As required by law, please add applicable state and local taxes on all merchandise delivered to CA, CT, FL, KY, MO, NY, PA, and TX. For Canadian orders, please add GST. We will add tax on all credit card orders. European Orders: All orders must be paid in U.K. £ VAT will be added at the rate applicable. Textbooks: Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm. Satisfaction Guaranteed: If the book supplied does not meet your expectations, it may be returned to us in a salable condition within 30 days of receipt for a full refund.

Please indicate quantities next to the title(s) ordered below:

| PREPARATIVE LAYER CHROMATOGRAPHY | ..........Catalog no. 4039, ISBN: 0-8493-4039-X / $169.95 / £97.00 each |
| HANDBOOK OF AFFINITY CHROMATOGRAPHY, SECOND EDITION | ..........Catalog no. DK1199, ISBN: 0-8493-4057-2 / $195.00 / £115.00 each |
| SEPARATION METHODS IN PROTEOMICS | ..........Catalog no. DK3068, ISBN: 0-8493-2699-5 / £159.95 / £92.00 each |
